Suppliers Show Scheduled for November 6 – 9, 2018 in Tulsa

The Suppliers Show hosted by the Oklahoma Gas Association and presented in conjunction with the Oklahoma Corporation Commission Pipeline Safety Department returns to the DoubleTree Warren Place, Tulsa, November 6 – 9, 2018

Suppliers will have time to meet with attendees before the sessions, during breaks and lunch, and following the conclusion of the seminar for the day.

The Exhibit Booth Registration fee is \$650 and includes a 6 foot skirted exhibit table, internet service, breaks and lunch with attendees for all four days.

Registrations will be accepted based on a first paid basis. Registration and completed payment will reserve a booth for the show. Once available booths have been reserved, a waiting list will be started.

(see SUPPLIERS SHOW page 5)

OGA Holds Annual Conference

Will it be commonplace by the year 2050 to have implantable technology in place that would allow a parent to know from their workplace if their kiddo is running a fever? Or if an employee or co-worker is having a medical issue?

Oklahoma Gas Association keynote speaker, Scott Klososky, suggested that just may very well be the case during his session titled, Cybersecurity: It's Enough to Scare you Back to the Dark Ages. In one of the most highly rated annual conference presentations, Klososky effectively built not only the case for cybersecurity and protecting data but also for recognizing the pace and scope technology will change our behaviors professionally and personally.

Moving back to work being completed today, the conference offered sessions on Regulator Relief Settings, Who Qualifies the Qualifier: How Companies Develop Their

Scott Klososky

(see CONFERENCE page 2)

We want to hear from you! Ideas, concerns, ways to make the association more effective for you.

OGA Board of Directors Elects New Officers

At the August meeting of the OGA Board of Directors, the board elected new officers effect Aug. 30, 2018.

Jason Crowe from Green Equipment Company was elected to serve as the chair. Enable's Ricky Whittington returns to a leadership role on the board as the vice chair. Larry Alspaugh, T D Williamson, and Vonda Zimmerman, US SafetySigns & Decal, will serve as secretary and treasurer respectively.

The remaining board members are: Jimmy Eastham, NOPFA; Steven Fry, CenterPoint Energy – Oklahoma; Brett Gresham, ONE Gas; Mark Haptonstall, AOG/Summit; Randy Mashburn, ONEOK Partners; Gary Pruett, Municipal Utility Board, Pryor; Clint Ratke, Williams. Advisory Board Members: Sean Epps, Heath Consulting; Rusty Jennett, LASEN™; Don McCoy, McCoy Consulting; Don Olson, IRT Integrated Rectifier Technologies, Inc.

Conference

(continued from page 1)

Standards, Achieving Situational Awareness in Real-Time and Near Real-Time Operational Environs, Effectively Responding to Customers or Landowners, and more.

For the first time the annual conference offered live "product demonstrations." T D Williamson, KGM,

Heath Consultants, SPX Radiodetection, Audobon Field Services, and IRT Rectifiers.

Mark Cluff, Vice President, Safety & Operations Discipline, Williams, delivered the final session titled "Pipeline Safety is Fragile"

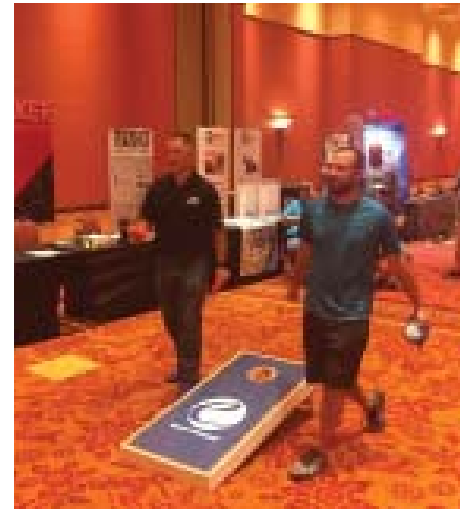

The 2019 Annual Conference will return to the Embassy Suites Hotel and Conference in Norman August 26-28.

KGM's Jeff Good and Terry LaBlue, Oneok Gas, at the Golf Scramble.

Jared Mikles, ONE Gas, dicusses "Effectively Responding to Landowners"

Members participate in the first OGA Cornhole Tournament.

OGA Awards Two Scholarships

The association awarded scholarship to two deserving dependents of members – Randi Bray and Bryce Harrison.

Randi is attending Seminole State College where she is pursuing a degree in Secondary Education with a Math Emphasis. Her father, Randy Bray, is with Enable Midstream Partners.

Bryce is the son of Brad Harrison from Enable Midstream Partners. He is attending Oklahoma State University with the goal of attaining a bachelor's degree in Entomology/Agronomy.

For more than a decade, the OGA has awarded scholarships to offset the cost of college. In past years, the association has awarded as many as four scholarships to some of Oklahoma's brightest students. To be eligible, qualified applicants must be a dependent child, grandchild, or ward of an employee or retiree of an OGA member company in good standing.

The scholarships are funded by proceeds of the association's annual Scholarship Classic Golf Tournament and fund raising activities at the Annual Conference.

Natural Gas Market Indicators: August 30, 2018

From the American Gas Association
By Chris McGill and Richard Meyer

Taking stock of some natural gas market measures. Some facts:

1. Gas storage inventories are at their lowest level at this point in the season in years.
2. US gas production is at its highest level ever.
3. The US is now exporting roughly 10 percent of its produced supply.
4. Domestic demand is robust and is up nearly nine percent year over year.
5. The market continues to price this winter's gas contracts at \$3 per MMBtu or below.

Where does this leave the prospect of gas supplies for the coming heating season? Our present situation has an analog as recent as 2014 when storage deficits left inventories below year-ago levels. The difference today? A lot more production, but also higher demand, including exports. The number of

days left in the typical injection season are waning; based on historical average fills, storage inventories are likely to begin winter at a deficit to last year.

Natural gas production is expected to continue to grow, and the impact on this winter's supply portfolio may be significant. And, Canadian and LNG imports will also be at the ready. The wildcard is mother nature, but the market is preparing. Depending on how the winter plays out, prospects of ending the heating season with a storage surplus year over year is very much in the cards.

Visit this link to download the full Natural Gas Market Indicators report. Topics covered in this week's report include: Reported Prices, Weather, Working Gas in Underground Storage, Natural Gas Production, Shale Gas, Rig Counts, Pipeline Imports and Exports, and LNG Markets.

Please direct questions and comments to Chris McGill at cmcgill@aga.org or Richard Meyer at rmeyer@aga.org.

Suppliers Show

(continued from page 1)

Show Schedule:

- Setup begins at 5:00 p.m., Monday, November 5
- Natural Gas Group – Tuesday, November 6 and Wednesday, November 7
- Hazardous Liquids Group – Thursday, November 8 and Friday, November 9

- Show starts at 7 a.m. daily and closes approximately 30 minutes after the final session of the PHMSA Training.

For more information, contact Jeff Kaufmann at (405) 528-7564 ext 6 or jeffk@meso.org. Registration information is available at www.okgas.org.

Natural Gas Continues to Play a Role in the Nation's Sustainable Future

From the American Gas Association

By Cha'Mia Holloman

Natural gas reaches 68 million homes, 5.5 million commercial customers, 188,000 factories and manufacturers, and 1,800 power plants. As one of the nation's top energy providers, the natural gas industry continues to move towards a cleaner environment through its efforts to reduce emissions.

During the past decade, U.S. natural gas consumption increased 17 percent and carbon emissions hit a 25-year low – making our air easier to breathe. In 2016, natural gas utilities helped customers reduce 12.4 million metric tons of carbon dioxide emissions. Also, natural gas appliances provide energy efficiency benefits to help the environment. Households with natural gas vs. all-electric appliances produce 37 percent fewer greenhouse gas emissions.

Natural gas is also creating a pathway for renewable energy, by continuing to be a reliable energy source that can be used at any time or weather condition. Additionally, renewable natural gas (RNG) is being developed as carbon neutral energy that can help reduce emissions. RNG is methane that is produced from farms, landfills and wastewater treatment plants, and can be used in homes, businesses and vehicles.

Recently, DTE Energy partnered with Pagel's Ponderosa Dairy in Kewaunee, Wisconsin on a RNG project using dairy cow waste to create RNG that will help fuel compressed natural gas vehicles. DTE foresees that this project will reduce greenhouse emissions by an amount equal to removing 9,200 vehicles that burn millions of gallons of gasoline. CenterPoint Energy also plans to launch a RNG program with the Minnesota Public Utilities Commission, which will provide customers the option to purchase RNG through their monthly bill.

Natural gas is not only integral to meeting the nation's energy needs, but it's also helping lead a sustainable energy future.
